IEEE SILCON 2025 is expected to bring together researchers, educators, students, practitioners, technocrats, and policymakers from academia, government, industry, and non-governmental organizations to discuss, share, and promote current research works across all aspects of electrical, electronic, computer science and instrumentation.

CALL FOR PAPERS

Authors can submit short (4 pages) and regular (max 6 pages) papers that contain original material which is not currently communicated in other conferences or journals and has not been previously published. Potential research topics include (but are not limited to) following thrust areas.

This 3-day event includes several keynote speeches by distinguished speakers from academia, industry, and government sectors; panels and forums; technical sessions featuring technical papers extensively reviewed by peers; workshops focusing on the latest trends in various technology; tutorials delivered by experts in respective disciplines; exhibits; an awards luncheon; and a relaxing and entertaining banquet. Also, there will be dedicated sessions on industry collaborations with academia and Women in Engineering (WIE).

After peer review, all accepted and presented papers of IEEE SILCON-2025, will be submitted to IEEE Xplore for their inclusion. There will be a few workshops co-located with the conference. Proposals to organize workshops in-line with the theme and main conference are also encouraged. In addition, those interested in the conference are also encouraged to submit proposals for tutorials and Ph.D. Forum.
